

NESBIT LAKES HOA CASE STUDY

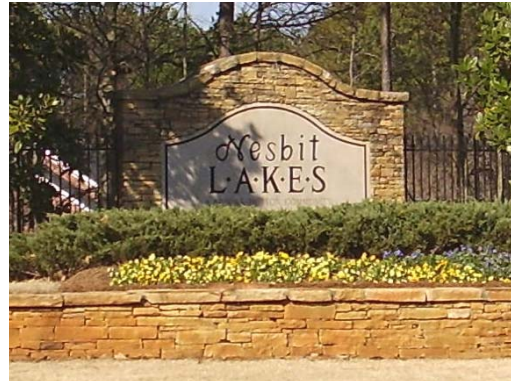

265+ Mailboxes installed in 5 days!!!!

Community Overview

Nesbit Lakes is a community located in Alpharetta, Georgia. There are 278 homes in the meticulously maintained community starting from the mid 500's.

The community has 5+ tennis courts, Olympic sized swimming pool, clubhouse as well as many other upscale amenities.

Problem

The original mailboxes installed by the builder were decorative cast iron posts with standard steel mailboxes. While these mailboxes looked great for the first few years, the inevitable rust factor began to set in and dramatically decrease the “curb appeal” of the community. The community was also in need of a newsletter box on their mailbox to avoid fines by the Postal Service. The Nesbit Lakes HOA decided that the time had come to replace all of the community mailboxes with a solution which would far outlast their cast iron, rusty mailboxes.

Residents held a “Goodbye Mailboxes” decorating contest

Solution

Addresses of Distinction replaced the existing mailboxes in the community with the Williamsburg cast aluminum mailbox system. This mailbox is targeted at the higher-end communities which want both a long lasting and architecturally decorative mailbox. All mailboxes were replaced in five days to minimize the impact on the mail delivery. In addition Addresses of Distinction installed a custom newsletter box so that the HOA can freely distribute their newsletter without any fines from the postmaster!

Custom newsletter box created!
